maxagon ab

Cookie Policy

We use cookies on our website. Cookies are small text files that are stored on your computer. This Cookie Policy contains information about the types of cookies we use, why we use them, and how you can prevent the use of cookies.

1. What types of cookies does maxagon.se use?

We use two types of cookies on our website. The first type is a persistent cookie that remains on your computer for a specific length of time and has an expiry date. It is used, for example, in connection with functions that indicate what is new since you last visited the website, and to store your personal settings. When the expiry date has been reached, the cookie is deleted when you return to the website that created it. The second type is a session cookie that is temporarily stored in your computer's memory during the time you visit our website. Such cookies are used, for example, to identify the language you have chosen. Session cookies disappear when you close your browser. We also use third-party cookies from other companies.

2. Why does maxagon.se use cookies?

We use cookies to follow and facilitate your use of our website, and to optimise its functionality. Cookies are also used to measure the traffic on our website, and for statistical purposes.

This means that we use cookies to (among other things):

- allow the system to recognise repeat users, in order to be able to customise the navigation and the services;

- facilitate your navigation of the website by, for example, allowing the system to remember your previous choices, and enabling you to set up favourites/shortcuts for programs and services;

- develop and improve the website by understanding how it is used; and

- calculate and report user numbers and traffic.

We use third-party cookies from other companies to perform market research and to improve the functionality on the website.

3. Can I prevent the use of cookies?

By using our website, you consent to the use of cookies in accordance with this Cookie Policy. If you do not wish to accept the use of cookies, you can disable their use in your browser settings. You can also adjust your browser settings so that you receive a notification every time our website tries to place a cookie on your computer. If your browser supports "incognito mode", you can activate this mode in order to automatically delete all cookies each time you close your browser. Furthermore, you can manually delete cookies from your hard drive at any time. For more information about how to enable or disable cookies, please refer to your browser's help section. Information about cookies is also available at ec.europa.eu/ipg/basics/legal/cookies/index_en.htm and www.aboutcookies.org.
